Chapter II

Mandatory part

You need to submit a file called `je_mappelle_gaetan.c` at the root of you repository. In the file there must be a function `void gaetan(void)` , that will print Gaetan's last name with all capital letters(with newline).

Chapter III

Turn-in and peer-evaluation

Turn your work in using your `git` repository, as usual. Only work present on your repository will be graded.
